11-12/09/2012 SAIDA, LEBANON

KTC of Malaga and Al Fayhaa

Exposed in the following presentations

11-12/09/2012 SAIDA, LEBANON

Additional support from international institutions

Several international institutions will realize in parallel with the SDS studies and equipments providing which will enrich the Saida SDS.

Some of them will provide analysis and proposals relevant for the SDS diagnostic and for the definitions of strategic projects of the action plan

It is crucial for the SDS management and contents that these actions will be coordinated in time with SDS process and with the work of the local team, the working groups, the consultative process and the main SDS outputs (diagnostic, vision and strategic framework, action plan). As an example, the supporting projects time program should provide inputs to Saida at the diagnostic phase and at the action plan phase.

The SDS management should be adapted to this purpose. The inclusion of a collaborator of the Project Manager to take care of this needed coordination.

A memorandum of understanding of Saida municipality with each partner is needed for specify contents, time coordination and the financial support for contracting the coordinator.
